

## DATAMATION SYSTEMS, INC

Clinical mobile device management made easy.  
When every second counts, you need a simple, secure, and reliable solution.

UniDock Intelligent Docking Station is a market leader in zero-touch mobile device management, charging, and syncing. That's why it's **trusted by 80% of the largest health care systems in the U.S. to:**

Fully leverage their mobile technology investment

Reliably and securely manage, charge, and sync large fleets of mobile devices

Ensure every device is ready to work the moment it is needed

Help clinicians be more efficient, productive, and focused on patient care

Save IT teams time, money, and labor

### UniDock: First. Future-proof. Flexible.

UniDock is the first drop-and-go charge and sync solution for mobile devices.

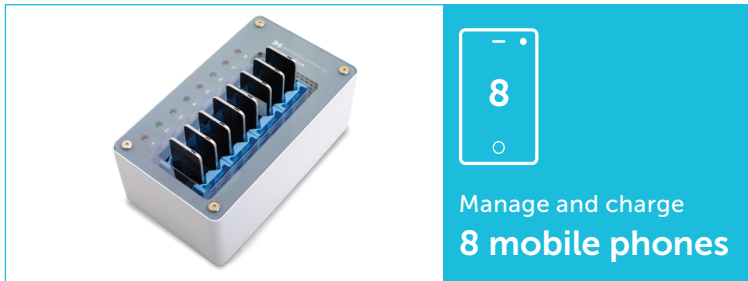

- Patented drop-in technology enables zero-touch and accommodates nearly any mobile device, unlike competitors
- Agnostic to platform, device, protective case, and battery case
- Eliminates the chaos of loose cables
- Open-API allows for fully customizable application development
- Modular and scalable for maximum organizational flexibility
- Facilitates enhanced application features including Single Sign-On (SSO), zero-touch device enrollment, and device data wipe
- Future-proof investment protection with field-upgradeable firmware, interchangeable connectors, and adjustable sizing guides
- Optional support for plug-in devices based on fleet requirements

UniDock products manage nearly **1 million devices** in health care organizations nationwide.
